

Ultimate Birthday Party Planner

A complete 27-page workbook for planning the budget, guests, theme, venue, food, games, decor, setup and day-of details.

This is the reusable planning system behind a calmer birthday: decisions first, shopping second.

How to use this planner

Start with the party snapshot and total budget. Next choose the setting and anchor activity. Only then move into decor, food and shopping. The point is to reduce conflicting decisions, not create more homework.

- Fill only the pages that apply to your party
- Use the guest count on every food and seating decision
- Revisit the day-of timeline 48 hours before the party
- Keep one working budget number
- Choose one anchor activity before buying extras

01 · Party snapshot
